

Home Page should work. Register Partner can work. Navigation on left should be right. Login from API can work. Login Partner can work. Partner Info should work.

Staff can upload signed agreements and see. Partner can see signed agreements. Staff can send leads out and partner gets email when leads is added. Partner can update lead status. Staff can upload and set which is the latest solution brochure to show

Forget Password can work. Partner can upload Leads to Corsiva Lab and

"admin@corsivalab.com" should get an email to login to set sales staff to lead.

Backlog

>> Partner can update Lead status >>to which table?

>> admin@corsivalab.com" should get an email to login to set sales staff to lead. >> how to set ,how UI look like and which table to store infor that staff already set to lead ??

1 . Home Page : index

2. Register Partner :

- + If @corsivalab.space login then >> Register , db ClmPartner

- + if Partner in ClmPartner login then not regist >> no register page appear

3. Login API for @corsivalab.space done , else Partner from db ClmPartner can login

4. Parner Info : done , info can store in cookie

5.Latest Solution Brochures : get the latest one from db CLM\_SolutionBrochures

By get last record and show or if not exist any record in db then [Upload Latest Solution Brochure](#) >> info store in db CLM \_ SolutionBrochures

6.Signed Agreements Repo tab : upload file into SignAgreementRepo server folder and get SignedAgreementsURL in ClmPartnerSignedAgreements tablet to show , FkPartnerId is get from partner login id (ClmPartner table)

7.Leads to Corsiva tab: Add Leads to ClmLeadsToCorsiva table

8.Leads From Corsiva:Staff add Leads to ClmLeadsFromCosiva table and select which partner to send email(Partner email is regist in Register Partner page in ClmParner table) when db added Leads done.Update Leads status by select LeadsFromCorsiva email table >and update into db clmLeadsStatusLogsToCorsiva table

9.Register page: done >> info store in ClmPartner

10.Forgot password click in login page:done >> find email in ClmPartner table ,if exist then send email. When partner click on link in email it will redirect to reset password ,after reset password then login with new password
